

Iris card with Inktense

Trace or sketch the design onto your background fabric. Make your fabric a bit extra large for now. Color with Inktense using one of the methods in the video, depending on how intense you want the color. You can leave some uncolored in the center of the flower pieces where the white and yellow go if you want.

Stitch around each of the shapes. Stitch veins on the flower parts, then stitch some white closer to the center if you want, then some yellow even closer to the center.

Or, look at iris photos and do your own thing! Mine is very simple and sketchy!

I have a youtube video to show how to do the binding and finishing.
